

EDITOR REPORT – 2019

Since our last annual meeting, produced four issues of *TEC News*: October, January, April, July.

Used PrintingCenterUSA in Montana (I said Wyoming last year, which is wrong) for the print copies of the newsletter. The service and prices are good. The print copies were shipped directly to Les Holbrook in California who did the stuffing, labeling, and mailing.

Continued using MailChimp software for mass emailing the membership. Adjusted the way the contact records are organized so that we can see the level of engagement of each subscriber. At Terri's request, used MailChimp to contact members who had not renewed, saving her from mailing some hardcopy overdue notices.

Sent design idea for 2019 *TEC News* contributor award elongated to Tyler Tyson. Die in production now. Contributors can expect to receive their awards after the October issue and before the end of the year.
